**Shoo fly...**

Charcoal... check! Boerewors... check! Ants...woah! Trust ants to be the first uninvited guests to show up at a braai and refuse to leave. Worse still, ants often leave pheromone trails to the source of food they've discovered, inviting their friends to the braai. Their party-crashing feats hint at why they thrive in just about any habitat. DYNEST is the perfect solution if you want to tackle the source of persistent insect infestations directly. Available in liquid format, DYNEST can be used to treat surfaces such as windowsills, kitchen floors or any other areas you find the invading insects. Specifically formulated to deal with ants, the active ingredient in DYNEST lasts between two and four weeks and is designed to be carried back to the nest after insects pass over a surface treated with the product. So, if you want your home to be pest-free, get serious and arm yourself with the specialist insect killer. To win one of 15 Dyrange hampers valued at R333 each, SMS ANTS.

### Welcome to the world of NUXE!

The story of NUXE (from Nature Luxe) Beauty By Nature is one of passion and plants, the dream-child of a daughter's lessons from her father. Aliza Jabès learnt about the therapeutic power of plants at the knee of her father, a pharmaceutical researcher, and she knew that when she created her skincare brand, NUXE would marry ingredients of natural origin with high performance, sensuality and a touch of poetry. This has proven to be an irresistible combination, and the award-winning aromatherapy and phytotherapy range for face, body and hair is a bestseller in France (number one for anti-ageing products in pharmacies), a cult-favourite among beauty editors and celebs, and one of the fastest growing brands around the world. Available at select Truworths stores. For more info, visit [www.facebook.com/NUXESA](http://www.facebook.com/NUXESA). To win one of seven NUXE hampers, valued at R1 130 each, SMS NUXE.
